

CANNED MOTOR PUMP

The Sealless, high-pressure solution for Oleochemical, Palm Oil refinery applications.

Key Advantages :

- Completely leak-free. No mechanical seal, safe for toxic, flammable and explosive liquids.
- Handles high temperature, high pressure, high melting point and low temperature liquids
- Ideal for vacuum-operated processes, where a conventional seal failure risks pulling air and contaminants into the pipeline, not just leaking product out
- Explosion-proof design available.
- Compact, modular structure. Easy Installation and maintenance
- Low noise operation
- Optional Pump Vibration Monitor (PVM). Tracks bearing wear, motor temperature, working current and records process data.
